#### **Reflow Profile**

## ■ Reflow Temp/Time

#### Notes:

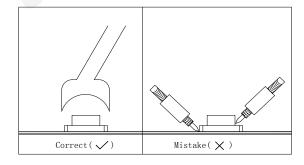

- 1. We recommend the reflow temperature 245  $^{\circ}$ C (±5  $^{\circ}$ C).the maximum soldering temperature should be limited to 260  $^{\circ}$ C.
- 2. Don't cause stress to the epoxy resin while it is exposed to high temperature.
- 3. Number of reflow process shall be 2 times or less.

## ■Soldering iron

Basic spec is  $\leq$  5sec when 320°C (±20°C). If temperature is higher, time should be shorter (+10°C $\rightarrow$  -1sec). Power dissipation of iron should be smaller than 20W, and temperatures should be controllable .Surface temperature of the device should be under 350°C.

### ■Rework

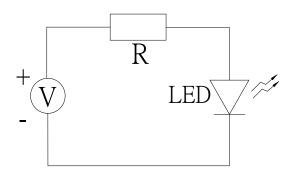

- 1. Customer must finish rework within 5 sec under 340°C.
- 2. The head of iron cannot touch copper foil
- 3. Twin-head type is preferred.

■ Avoid rubbing or scraping the resin by any object, during high temperature, for example reflow solder etc.

#### Test circuit and handling precautions

#### ■ Test circuit

## ■ Handling precautions

#### 1. Over-current-proof

Customer must apply resistors for protection; otherwise slight voltage shift will cause big current change (Burn out will happen).

#### 2. Storage

2.1 It is recommended to store the products in the following conditions:

Humidity: 60% R.H. Max.

Temperature: 5°C~30°C

2.2 Shelf life in sealed bag: 12 month at  $<5^{\circ}\text{C}^{\sim}30^{\circ}\text{C}$  and <30% R.H. after the package is opened, the products should be used within a week or they should be keeping to stored at  $\leq$  20 R.H. with zip-lock sealed.

## 3. Baking

It is recommended to baking before soldering when the pack is unsealed after 72hrs. The Conditions are as followings:

- $3.1 60\pm3$  °C x ( $12\sim24$ hrs) and <5%RH, taped reel type
- 3.2 100±3°C x (45min~1hr), bulk type
- 3.3 130±3°C x (15~30min), bulk type
