# **SPECIFICATIONS**

## **Features**

- High speed response.
- High reliability and long life.
- Low power consumption.
- Available in red, orange, yellow, yellow-green, green, blue, white, pink\*
- Suitable for pulse operation.
- RoHS compliant.

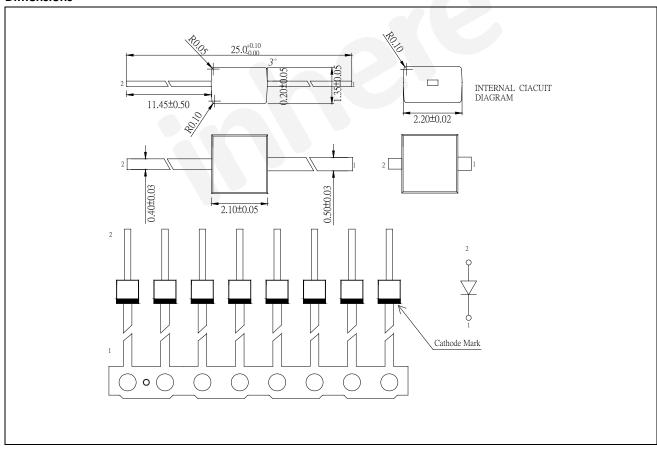

# Description

• The White source color devices are made with InGaN/GaN on Al<sub>2</sub>O<sub>3</sub> Light Emitting Diode.

# **Applications**

- Automotive: Dashboards, stop lamps,
- Backlighting: LCDs, Key pads advertising
- Status indicators: Consumer & industrial electronics.
- General use

## **Dimensions**

#### Notes:

- 1. All dimensions are in millimeters (inches).
- 2. Tolerance is ±0.25 (0.01") unless otherwise noted.
- 3. Lead spacing is measured where the leads emerge from the package.
- 4. Specifications are subject to change without notice.

Part No.: LW935AD-001 Prepared by: Lily Rev.: A Checked by: Tom Date: 2018-08-14 Approved by: Wangxiaojun

# **Selection Guide**

Part No.	Dice E	Emitting Color	Lens Type	I <sub>V</sub> (mcd) @ 20mA			Viewing Angle(°)	
				Min.	Тур.	Max.	$2\theta_{\frac{1}{2}}$	
LW935AD-001	InGaN	White	Water Clear	200	700		120	

Note:

- $1.\, heta_{\frac{1}{2}}$  is the angle from optical centerline where the luminous intensity is  $\,\frac{1}{2}\,$  the optical centerline value.
- 2. The tolerance of luminous intensity (Iv ) is  $\pm 15\%$ .

Electrical / Optical Characteristics (at  $T_a = 25$ °C)

Precentary Optical charac		Value					
Parameter	Symbol	Min.	Тур.	Max.	Unit	Test Condition	
Forward Voltage	$V_{\rm F}$	2.7		3.5	٧	I <sub>F</sub> = 20mA	
Color Temperature	ССТ	9000		14000	-	I <sub>F</sub> = 20mA	
Reverse Current	$I_R$			10	μА	$V_R = 5V$	

Note:

- 1. The tolerance of forward voltage is  $\pm$  0.05 V..
- 2. The tolerance of color temperature is  $\pm\,400\text{K}.$
- 3. This specification is a standard specification of our factory, can make in accordance with customer's special requirement.

Absolute Maximum Ratings (at  $T_a = 25$ °C)

Parameter	Symbol	Value	Unit	
Power Dissipation	$P_{\mathrm{D}}$	95	mW	
Peak Forward Current *1	$I_{\mathrm{FP}}$	100	mA	
Forward Current	$I_{\mathrm{F}}$	25	mA DC	
Reverse Voltage	$V_{\mathrm{R}}$	5	V DC	
Operating Temperature	$T_{ m opr}$	-40 ~ +85	°C	
Storage Temperature	$T_{ m stg}$	-40 ~ +100	°C	
Soldering Temperature	T <sub>sol</sub>	260°C for 5 sec 3 times		

Part No.: LW935AD-001 Rev.: A Date: 2018-08-14

## **Characteristic Curves**

# **IR-Reflow Soldering**

- 1. Avoid any external stress applied to the resin while the LEDs are at high temperature, especially during soldering.
- 2. Avoid rapid cooling or any excess vibration during temperature ramp-down process
- 3. Although the soldering condition is recommended above, soldering at the lowest possible temperature is feasible for the LEDs

## **IRON Soldering**

350°C within 3 sec., One time only.

## Notes for designing:

Care must be taken to provide the current limiting resistor in the circuit so as to drive the Inhere LEDs within the rated figures. Also, caution should be taken not to overload Inhere LEDs with instantaneous voltage at the turning ON and OFF of the circuit.

When using the pulse drive care must be taken to keep the average current within the rated figures. Also, the circuit should be

# Storage:

In order to avoid the absorption of moisture, it is recommended to solder Inhere LEDs as soon as possible after unpacking the sealed envelope.

If the envelope is still packed, to store it in the environment as following:

designed so as be subjected to reverse voltage when turning off the Inhere LEDs.

- (1) Temperature: 5°C-30°C; Humidity: RH 60%Max.
- (2) After this bag is opened, devices that will be applied to infrared refold, vapor-phase refold, or equivalent soldering process must be:
- a. Completed within 168 hours.
- b. Stored at less than 30% RH.
- (3) Devices require baking before mounting, if:
- (2) a or (2) b is not met.
- (4) If baking is required, devices must be baked under below conditions:
- 48 hours at 60°C±3°C.
